DETAILED ACTION

Allowable Subject Matter

1. Claims 1-32 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art searched and cited failed to teach applicants invention that relates to reference libraries of composite spectra that consolidate, into a single searchable data set, information from multiple independent spectra of a chemical compound taken under multiple conditions using a single analytical technique. Applicant's limitation of having a reference library of composite spectra generated by acquiring multiple independent spectra for a known chemical compound under multiple predefined instrument conditions, each independent spectra including an x and y axis, renumbering the units on the x-axis of at least one of the independent spectra so that the x-axes of the independent spectra do not perfectly overlap, and generating a composite spectrum for the unknown chemical compound from said independent spectra by aligning the x-axes of the independent spectra on a composite x-axis is the allowable subject matter over that prior art. Such subject matter, in combination with the remaining elements are present in independent claims 1, 9, 17, 27, and 32, is considered allowable. Claims 2-8, 10-16, 18-26- and

28-31 are allowable because of their dependencies upon that above mentioned independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All of the US references cited on attached form 892 contain art similar to that being claimed by applicant, more specifically, molecular spectrum determining methods and apparatuses.
